Supervised By

Md. Rakib Khan
Business Development Manager
eChithi

Internship Duration:
July 2025-September 2025

Submitted To

Dr. Homeyra Akter
Assistant Professor
Department of Computer Science and Engineering
University of Asia Pacific

Submission Date: 30 October 2025

Certification of Originality

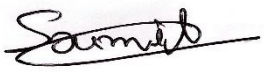

This is to certify that the report titled "Developing Practical Learning Through **System Support Executive** at **eChithi**" has been prepared by **Soumit Dey**, ID: 21201024, as part of the Bachelor of Science in Computer Science and Engineering program at the **University of Asia Pacific**.

The content of this report reflects the author's genuine learning and internship experience at **eChithi**. All analyses, reflections, and descriptions included are based on personal involvement during the internship period and have not been used or submitted for any other academic requirement.

Gratitude and Appreciation

It gives me immense pleasure to express my appreciation to all who played a role in making my internship journey meaningful and productive. First and foremost, I sincerely thank **the Department of Computer Science and Engineering, University of Asia Pacific**, for integrating a professional internship into the academic curriculum — a crucial step in preparing students for the real-world industry environment.

My deepest gratitude goes to **eChithi**, whose guidance and encouragement shaped my practical understanding of technical training. I owe special thanks to **Mr. Md. Rakib Khan**, my supervisor, for his patient mentorship, continuous motivation, and valuable insights that helped me grow as both a professional and an individual. I also extend my heartfelt thanks to all team members at **eChithi** for their cooperation, teamwork, and friendly environment, which made every day of this internship enjoyable and full of learning.

Lastly, I would like to thank my friends and family for their constant inspiration and emotional support throughout the internship period.

1. Overview of the Internship

Internships are a stepping stone between theoretical knowledge and industrial experience. My three-month internship at **eChithi** provided a platform where I could combine my technical understanding with practical teaching and project coordination.

Purpose of the Internship

The internship aimed to:

- Expose students to corporate technical training practices.
- Strengthen communication and leadership abilities.
- Gain experience in organizing and conducting professional workshops.
- Understand how training and technology merge to promote innovation.

My time at eChithi was not just about learning technology — it was about understanding teamwork, teaching others, and growing as a professional.

2. Company Overview: eChithi

eChithi is a dynamic Bangladeshi organization that operates at the intersection of technology, business, and innovation. Established in 2022, the company offers services in e-commerce, digital logistics, cloud solutions, and technology education. What sets eChithi apart is its belief that *technology should empower everyone*. The company focuses on providing affordable digital services and practical skill development opportunities through technical training and workshops.

Mission: To integrate digital technology into daily life by offering efficient, reliable, and accessible tech-based solutions.
Vision: To build a sustainable digital ecosystem in Bangladesh through innovation, quality service, and community engagement.

3. My Internship Journey

3.1 Assigned Role and Main Tasks

During my internship, I served as a **System Support Executive** role under the direct supervision of the Business Development Manager. My position involved preparing and conducting practical sessions for university students, creating educational content, and assisting in the overall management of training events.

Key Responsibilities:

- Designing and conducting hands-on workshops on Embedded Systems and IoT.
- Preparing instructional slides, demonstration kits, and practice files.
- Managing event coordination and participant communication.
- Evaluating student performance and gathering feedback after sessions.
- Assisting in developing content for **eChithi's** tech training program.

3.2 Workshops and Learning Programs

The highlight of my internship was organizing two successful workshops at the **University of Asia Pacific**, representing **eChithi** as a corporate trainer.

Workshop 1: ***"Fundamentals of Embedded Programming with Arduino UNO"***

- **Position:** Trainer
- **Date:** August 21, 2025
- **Duration:** 2.5 hours
- **Focus Area:** C/C++ programming and Arduino-based system design.
- **Objective:** Introduce participants to basic microcontroller architecture and embedded development.

Session Details:
Students learned to interface sensors with Arduino, upload programs, and observe system outputs. I supervised individual progress and guided them through troubleshooting tasks.

Workshop 2: ***"IoT Application Building Using ESP01S"***

- **Position:** Trainer
- **Date:** September 17, 2025
- **Duration:** 2.5 hours

- **Focus Area:** Internet of Things and Wi-Fi module integration.
- **Objective:** Help participants design and test simple IoT devices capable of sending data online.

Session Details*:*
This workshop emphasized data transmission, sensor reading, and device control using cloud services. It allowed participants to understand how IoT connects the digital and physical worlds.

Through these programs, I learned how to manage a classroom-style environment, maintain engagement, and ensure learning outcomes were achieved effectively.

3.3 Organizational Contribution

My work contributed to strengthening **eChithi's** collaboration with educational institutions and enhancing its visibility as a company that supports student learning.
I helped improve training content presentation, introduced structured assessment methods, and maintained post-event documentation.

The workshops helped the company establish a reputation for promoting tech education and bridging the gap between industry and academia.

4. Knowledge and Skills Gained

4.1 Technical Growth

- Acquired hands-on knowledge of Arduino and ESP01S IoT modules.
- Enhanced coding skills in C and C++.
- Learned to create training documentation and visual materials using Canva.
- Gained exposure to IoT data communication and system design.

4.2 Personal and Professional Development

- Improved presentation and public speaking confidence through live training.
- Strengthened leadership skills by handling full event cycles.
- Learned time management and collaboration in a professional setting.
- Developed an understanding of corporate ethics, communication, and reporting.

5. Reflection and Career Impact

The internship at **eChithi** was an eye-opening journey that transformed how I view professional growth and knowledge sharing. Acting as a trainer taught me how to combine technical expertise with human interaction — a rare balance in the tech world.

I realized that teaching technology can be just as impactful as developing it. This experience encouraged me to pursue future roles in tech education, research, and innovation-driven IT sectors.

Overall, this internship has helped me discover confidence, leadership, and a genuine passion for technology that will guide my career path in the years ahead.
